AIM OF THE CONFERENCE

The number of challenges that sustainability poses to society and businesses is increasing globally, nationally and on the level of economic sectors alike. That is why the EU has made a commitment to become climate-neutral by 2050. This commitment makes it necessary for the EU member states to make economic and social changes in a cost-effective, fair and socially balanced way. The European Green Deal is a strategy aimed at creating a fair and flourishing society, and a sustainable, modern, competitive economy that uses resources efficiently. In order to achieve that goal, the EU has announced initiatives in several, closely related areas, including common climate policy, environment protection, energetics, transport, industry, agriculture and sustainable funding.

This encourages the member states, as well as researchers, professionals and decision-makers of the relevant fields to consider the challenges and opportunities, and rethink their strategies for the future in order to meet the new requirements in all the economic sectors.

With a history of over three decades, our international conference offers an opportunity for discussion to professionals researching the above topics so that we can find answers to the numerous questions.

Similarly to our previous conferences, we hope to have a fruitful exchange of ideas both formally and informally, thus contributing to finding solutions to these complex questions. As part of our long-established tradition, all the talks presented will be included in the Conference publication. Both speakers and delegates are warmly welcome to our international conference.

TALKS AND POSTERS

One participation fee entitles a participant for no more than **two publications (where the participant is the first author)**: either two presentations, or one presentation and one poster, or two posters. **Registration and payment must be made UNDER THE NAME OF THE FIRST AUTHOR IN EACH CASE.**

In case of too many registrations, the organisers reserve the right to provide opportunities only for presentations and posters closely connected to the given topics. In that case, the Scientific Committee and the chairs of the sections will be asked to make recommendations concerning the topics to be presented in the sections or in the poster section, and also concerning possible rejections.

In the poster section of the conference, uniform poster panels (Size B1, 700x1000 mm) are provided. Please make sure that the poster you send us or bring with you is of the indicated size.

The presentations and posters are to be proof-read by the Scientific Committee before being included in the conference publication. Papers of no more than 8 pages meeting the content and format requirements will be arranged into topics and published in an electronic publication edited as a book, with an ISBN number.

Based on the recommendation of the Scientific Committee, outstanding papers will be invited for publication in the journals 'A Falu', the 'Journal of Central European Green Innovation' and 'Acta Carolus Robertus', as well as 'Ecocycles'.

Format requirements of posters and papers can be downloaded from <https://ntn.uni-mate.hu/>.
